## AHARD EP BOLDPAINT/OP

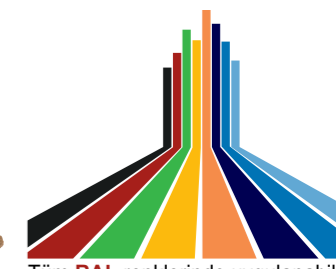

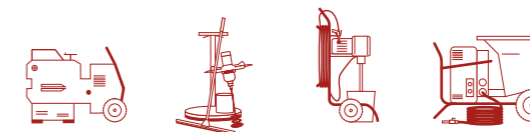

It is light service surface coating system in which grained epoxy thick paint used as main material. It is epoxy based, it makes surface as orange zest, it has high density and it is very strength surface. It is very preferred system because it is so economical, decorative and easy renewable. Because of its orange zest pattern, it prevents sliding. This system is especially suitable for parking areas, it stops sliding problem. This surface, provided by EP grained paint, can be easily renewed for colour change and esthetical corrections. New surface can be provided with very low budget by applying Epoxy paints in RAL colours to needed surface. Logos, road lines, signs can be applied onto surface.
